System Description

Nethack is an old game where you walk in a dungeon and explore. Each level has a different landscape which is generated randomly. The objective of the system we are going to develop is to make a similar game where the map is generated by Twitter feeds. The system shall also follow a list of requirements.

High Level Epics

Motivation for priority: Big tasks, important to the customer, can be broken down

- . 14 As a game designer I want the game to have caves with labyrinths where the maps are generated by the use of Twitter API so that I do not have to program all maps and the number of maps will be increased.**
-

- . 15 As a player I would like to be able to chat with other players in a chatroom and be able to give/use items on the other players so that the game becomes more social**

- . 16 As a game designer I want the players to have health and the functionality of dieing so that the games do not get to easy**

- . 17 As a player I should be able to pick up items to my backpack and use them or drop them so that the game gets more exciting**

- . 18 As a player I want there to be other characters that move around freely in the game which I can interact with so that the game gets more fun**

User Stories

Motivation for priority:

- Vital part of the game,
- The functionality is included in more than one use case

Order of importance, descending order:

ID	User Story	Parent Epic
1	As a user of the application I shall be able to play the game so that I have a fun time.	-
5	As a player I would like to be able to communicate with other players so that the game also is social	#15
13	As a game designer I would like the labyrinths to be randomized so that I don't have to program all the different maps	#14
4	As a player I would like to have a backpack so that I can store items on me	#17
2	As a player I should be able to join an existing game so that I can interact with other players.	#15
11	As a game designer I would like the players to have health points so that they can lose and have to start over.	#16
3	As a player I would like to interact with items so that the gameplay becomes more varied	-
7	As a player I would like to see all the players in the chat room so that I know who I am talking to	#15
12	As a game designer I would like to have items that fall on the players so that they lose health.	#14
10	As a player I would like to be able to send my items to another player so that I can help him	#17
9	As a player I would like to be able to use my items on another player so that we can help each other or damage each other	#15
8	As a player I would like to be able to leave the chat so that I can concentrate on the gameplay	#16
6	As a player I would like to be able to drop items from my inventory so that I can get rid of items that I do not want	#15
19	As a player I want to be able to interact with other characters in the game so that it gets more fun to play	#16
